ABOUT THIS UPDATE

Version 2.0 documents all changes between version 1.0 and version 2.0 of the dataset. It contains **no new observations** and no changes to the underlying data; the update is limited to corrections of metadata fields on the Harvard Dataverse repository. All notes documented in the version 1.0 Cautionary Notes file remain fully applicable to version 2.0.

01 ELECTORAL COVERAGE

02 DATA CORRECTIONS

The dataset file is substantively identical to version 1.0. The number of rows (5,301), variables (43), and all variable values are unchanged. Minor floating-point representation differences may appear when comparing files programmatically due to xlsx-to-csv conversion; these are at the level of $1e-9$ or smaller and have no effect on any calculation.

The following metadata fields were corrected on the Harvard Dataverse record:
